

Retouching notes:

1) all mannequins color must match. Try to match close to this

2) for bracelets pics, remove all clips, tattoos, and extra strands

3) try to remove as much black parts as possible

4) front shots mannequin needed but the back shots please remove the mannequin and put on white

5) for EMSN006-1 the beads were made wrong. I need both sides to match. I've circled the beads that are wrong

6) EMSN021-2 I need the top layer white beads to be photoshopped on the bottom image under the gold beads. You will need to probably elongate the necklace bar attachment

7) EMSN027-2 I need the bottom white beads and the top image gold beads to be together. Probably need the bar back attachment style. It should be gold beads on top of white beads like in image 1

8) emsn028-1 and 2 I need the chain removed so it's just the gold beads. The back shot needs the above attachment style (not the bar) because we are removing the chain

9) do all the other shots before messing with the backs that need to be photoshopped. If it's too impossible let me know and we will just not have a back image for those ones. I think they want images by end of week for sure.
