

#10

You didn't change the chain for photo number 10.
Please only use the last updated retouch version
of the chain necklace in the picture.

#11

Diamond is ok but the position of pendant (diamond) does not look properly. It is a little bit crooked. I tried to show it with a red line. Two little circles must position symmetrical and also the pendant. Left and right arm of the chain have different angles. They should be shown equal and same.

Second pic is ok. Thanks

Pendant is ok but we see dark areas on the small circles on the chain. Please fix it. And chain's colour must be the same as the pendant colour.

Same comments valid for this photo too.
